Meet Alexzander Ciminillo, a senior student from Lima, Ohio, attending Lake Campus! A passionate student with a smile on his face every day, we sat down to ask him what makes him tick!

**Lake Bulletin:** What are three interesting facts about yourself?

**Alex Ciminillo:** I spend nearly all my free time and any time I can muster together studying Japanese, I enjoy programming applications, and I'm married to a redhead.

**LB:** Why did you choose your major in mechanical engineering?

**AC:** I thought it would be wise to be well-educated so that if need be, I can always provide for myself and my family. Even though I don't plan to get a job in engineering directly, I chose this major so I will be well-equipped and prepared if times ever get hard.

**LB:** What's your favorite music to jam?

**AC:** My favorite artist is Toby Mac, but I jam mostly to anime theme songs! *Full Metal Alchemist* and *One Punch Man* are my favorite ones to get me psyched!

**LB:** What are your future degree plans?

**AC:** I plan to continue my education in programming. If all goes well, the knowledge I have gained from studying engineering will be used in my everyday life problem-solving.

**LB:** What's your life motto?

**AC:** "If you shoot for the stars, you might make it to the moon." I make it my main objective in life to set goals that are extremely hard that some people say cannot be reached. Then, with all my effort possible, I try to achieve! Even though I may fail, I accomplish much more than I would have if I had set an easier goal.

**LB:** What's your super power?

**AC:** Exerting all my effort and time on what I want to achieve and not giving distraction even a glance.

**What is your favorite gift to exchange for Valentine's Day?**

**Twitter & Facebook Poll**

- **It's Overrated:** 56.0%
- **Dinner:** 25.0%
- **Flowers:** 12.5%
- **Chocolate:** 6.5%
- **A Get Away:** 0.0%
New Full, 4-Year Degree Offered at Lake Campus

Wright State University has approved a new opportunity available in-full at our Lake Campus: Bachelor of Arts in Psychology, with Dr. Dave Hochstein at the helm. Students will be provided with foundational psychological theory, research, data management, and statistical analysis skills, alongside crucial communication expertise. Potential job opportunities with this degree are all but endless. Alongside traditional clinical practice and research that may come to mind when students traditionally think of the field of psychology, the scope of psychology is broadening by the day. Human resources, communications, business management, conflict mediation, consulting, counseling/therapy, criminal justice, education, and marketing are just a small portion of the jobs in which the field of psychology flourishes.

Students with questions about the program can contact their advisors, or they may email Dr. Hochstein via dave.hochstein@wright.edu.
